

## **Competitor Bulletin #3**

July 20, 2008

### **Protect the Service Area Parking Lot Surfaces and Keep the School and Airport Areas Clean**

All Service crews are responsible to protect the parking lot surfaces from all oils, fuels, and other fluids. Please use tarps to protect the asphalt against any spillage.

All dirt from motorcycles, cars, and wheels must be cleaned up by the service crews and taken away.

Any crews or competitors violating this policy may be subjected to penalties.

We are guests at the schools, and they are ready to start school in less than 3 weeks after our event. The airport is very sensitive to keeping a clean environment; the operation of aircraft can be adversely effected by dirt and trash ingested into engines.

Please use the same care in cleanliness for any area in which you work in on your competition vehicle in the Elkins area, including your motel.

We must keep the area clean!
